Work Experience

Data Analyst Trainee in CDP Team Nov 2024 — Feb 2025
SynergyXYZ *Puchong Jaya, Selangor*

- Evaluated and maintained 20+ Customer Data Platform (CDP) vendors, analyzing features, pricing, and integration capabilities.
- Contributed to defining service offerings and solution positioning within the CDP team.
- Assisting in client research and compiling proposal decks for 3 different cient.
- Authored early-version of CDP platform SDK and workflow documentations for internal use.

Volunteer Experience

Website Admin July 2024 — Nov 2025
PPI Monash Malaysia *Subang Jaya, Selangor*

- Plan and executing total revamp of PPI Eunoia Wordpress website.
- Publishing writtten and video content on the PPI Eunoia Website.
- Assisting in PPI Monash Event program, beyond web administration.

Projects

Patent Analyzer Python, Django, OpenAI, TogetherAI, QdrantDB, Selenium

- Built an end-to-end patent analysis platform using TRIZ principles and LLM reasoning to extract structured insights from raw patent documents.
- Designed and implemented a hybrid search using QdrantDB for user QA with data of 10k tokens to ensure accuracy between semantic and keyword.
- Developed automated data ingestion pipeline (BeautifulSoup, Selenium) for large-scale patent text extraction.
- Implemented Chain-of-Thought prompting strategies to improve classification accuracy and reasoning quality.

Deneb - Finance App Python, Golang, TanStack Router, TypeScript, PostgreSQL, Google ADK, YOLO, React, Better-Auth

- Built a full-stack expense tracking platform using React (Shadcn UI), TanStack Router, Golang, and PostgreSQL.
- Implemented secure email OTP authentication using Better-Auth.
- Developed RESTful APIs and scalable backend architecture for financial data management.
- Integrated a multimodal multi-agent AI system using Google ADK.
- Built a YOLO-based receipt preprocessing pipeline and tracked ML models with MLflow.

SkillTune - Resume Adjuster Python, LangChain, SQLite, JavaScript

- Built a Chrome extension to summarize job descriptions, evaluate resume compatibility, and generate tailored resume improvements.
- Developed LangChain prompt pipelines and customized Typst prompts for DeepAgent-based resume generation.
- Implemented SQLite-based caching using website URLs as cache keys.

DeckWorks - OSS alternative for Slides-making harness Python, React, Opencode, Langchain, Langgraph

- agent-composed slides from source material with anchored-comment review; exports to HTML/PDF/PPTX.
- custom Tailwind v4 design system, theme presets, skeleton loaders; no generic AI-UI patterns.
- Developed orchestration system that works with opencode and agentic sdk, using skills and mcp.
- Enable compatibility with existing agentic coding harness through packaged mcp and skills.

Technical Skills

- **Languages**: Python, Golang, SQL, R
- **AI/ML & Data**: PyTorch, Scikit-Learn, XGBoost, LangChain, Pandas, Polars, NLP, Computer Vision, RAG Pipelines
- **MLOps & Infrastructure**: Docker, MLflow, Git, GitHub Actions, Kafka, Spark, QdrantDB
- **Frameworks**: Google ADK, Django, FastAPI, BeautifulSoup4, Selenium

Education

Monash University Malaysia Subang Jaya, Selangor

Bachelor of Computer Science in Data Science *Feb 2023 — Nov 2025*

- Relevant Coursework: Data Structure and Algorithm, Data Management and Warehousing, Data Modelling, Computation Theory, Data Analytics, Data Visualization, Object-Oriented Programming, App Development in Android, Big Data Processing, Discrete Math, Continuous Math, Microeconomics

Monash College Subang jaya, Selangor

Diploma of Higher Education Study in Information Technology *feb 2021 — Nov 2022*
